

eClinicalMobile allows users to access patient information from a hand-held device that has standard Web browser capabilities, currently supporting iPhone®<sup>1</sup>, anywhere at any time. The screen has been optimized for hand-held devices and loads quickly because only pertinent data is accessed on this version. Users are able to access schedules, write prescriptions, and access encounters with the peace of mind that the data is encrypted and hosted on a secure gateway. eClinicalMobile provides user name and password as part of the log-on security function. Once logged in, icons are displayed for ease of use in choosing your function.

### **Function Capabilities:**

- Full message capability

eClinicalWorks understands the daily juggling act that providers deal with trying to balance their life outside of the office. eClinicalMobile provides you with the tool that allows you to be in contact with your staff and have access to the vital information that resides on your computer without having to go into the office. This means that the demand of being accessible to your patients and staff whether you are on the golf course, at the store, on-call after hours, at the hospital, nursing home, or on vacation is possible. eClinicalMobile offers you access to your patient's information with a tap of the screen enabling you to provide your patients the best care possible and in a timely manner.
